

CGMS-38 last day (12-11-2010) events

CGMS-38 fourth day started with the presentation of reports by four Working Groups (I to IV) which are mentioned in the CGMS-38 Agenda . The reports were presented by the Rapporteurs of the respective working groups along with the recommended actions and recommendations. The participants examined all the reports and gave their suggestions which were noted by the EUMETSAT secretariat. The reports incorporating all the suggestions will be circulated to all the participants before finalizing and printing. The following other items were also discussed during this day:

H.1 Training

H.2 Information

H.3 Any other business

I.1 Nomination of representatives at WMO , WMO STG , CEOS and other meetings

I.2 Nomination of Chairmen and Rapporteurs of working groups for CGMS-39

I.3 Nomination of Rapporteurs of UIPWG .IROWG,ITWG, IWWG

I.4 Date and Place of Next Meeting: Russia

I.5 Handing over of the CGMS flag from IMD to **ROSHYDROMET**
RUSSIA.

CGMS-38 meeting was followed by the the meeting of Global Space based Inter Calibration System (GSICS) at the same venue which was attended by the members of GSICS where in the calibration of satellite sensors on all the meteorological satellites was discussed . ISRO being a member also presented their report on calibration . IMD attended this meeting as an observer and also proposed for getting the membership of GSICS as it will help in calibrating the existing old INSAT data and future satellites data by internationally recognized procedures.
