Wednesday 15 August 2018

Time of Issue: 1630 hrs IST Based on 1430 hours IST Observations

All India Weather Inference (EVENING)

- ♦ The **depression** over coastal Odisha & neighbourhood moved west-northwestwards and lay over Odisha centred at 1130 hours IST of today, the 15th August 2018 near Lat. 20.1°N and Long. 85.6°E, about 30 Km southwest of Bhubaneshwar. It remained practically stationary over the same region at 1430 hours IST of today, the 15th August 2018. It is likely to move west-northwestwards during next 24 hours.
- ♦ The trough from the cyclonic circulation associated with the above depression to southeast Rajasthan across south Chhattisgarh and south Madhya Pradesh between 3.1 and 5.8 km above mean sea level persists.
- ♦ The axis of monsoon trough at mean sea level continues to pass through Anupgarh, Hissar, Aligarh, Banda, Ambikapur, Rourkela, centre of the depression over Odisha and thence east-southeastwards to eastcentral Bay of Bengal.
- ♦ The feeble off shore trough at mean sea level runs from south Maharashtra coast to Kerala coast persists.
- ♦ A low pressure is likely to develop over north Bay of Bengal and neighbourhood around 18th August.
- ♦ The cyclonic circulation over East Uttar Pradesh at 3.1 km above mean sea level persists.
- ♦ The cyclonic circulation between 3.1 and 5.8 km above mean sea level over northern parts of Punjab & neighbourhood persists.
